

Server Rack Lifter

SRL

Specifically designed and tested for operation in all data center environments, including aluminum floors. This manual lifter, which can be towed by the MT700 vehicle, ensures accurate alignment of equipment and eliminates risk to personnel and equipment.

- Easy loading/unloading in confined areas within Data Centers Stable, super maneuverable operation virtually anywhere a person can walk, including elevators. Easy transport of most IT equipment components throughout the Data Center, with its **650lb. cargo weight limit**. Balloon Tires (optional foam filled) for safe use on raised floors.
-
- Constructed of Tig Welded aluminum for lighter weight and lower center of gravity of the trailer. Weight capacity of shelf pull-out slides and plastic-topped equipment deck is 200lb. Pre-attached aluminum mounting/tie-down brackets on each plastic-topped equipment deck
- permit any load to be secured for transport, and easily assessable when securing IT equipment.
